Conditions of Service

1. Prior to the stud service, the bitch owner will provide the following information to the stud owner via text, email, mail, or fax:

- Negative brucellosis test dated within 14 days of a natural breeding (only required for natural breeding) This test can take your vet a week or more to get results. Do NOT delay!
- Proof of AKC pedigree
- Proof of normal OFA hip report
- Proof of normal OFA elbow report
- Proof of CNM report - can be via parentage
- Proof of EIC report- can be via parentage
- Proof of board-certified ophthalmologist's CERF report
- Proof of up-to-date shot records with dates: DHLPP: _____, Rabies: _____, Bordetella: _____

FC AFC Wight's The Dark Side "Vader"

Stud Agreement

2. The bitch owner agrees to perform progesterone and/or LH testing on the bitch to determine the proper breeding window. Before a natural breeding will be attempted, a current progesterone test that shows a progesterone level higher than a 5.0 will be required. Breeding should then occur 2 days after the level is above a 5.0 ng. The bitch owner will be responsible for any and all medical expenses, including those pertaining to hormone testing and veterinary fees. If a natural breeding cannot be accomplished, and the bitch owner desires to proceed with an AI breeding, the bitch owner agrees to provide a credit card number to the collecting veterinarian to cover any AI costs, and to pay any travel fees incurred to transport the bitch and stud to the AI facility.

You can usually wait to do the first progesterone number on the 8th day of her heat cycle. Please do not stop testing until you've reached a number over 5ng/ml or recommended by your veterinarian.

Understanding when to breed:

Progesterone Results		Action
Below 1.0 ng/ml	No ovarian activity	Test every 3 or 4 days
1.0 to 2.0 ng/ml	Rise indicates active ovary	Test in 2 to 3 days
2.0 to 4.9 ng/ml	Active ovary	Test every 24 hours until you determine 5.0
5.0 – 8.0 ng/ml	OVULATION	WAIT 2 more days for the eggs to mature and then breed
6 to 11 ng/ml		BREED in 1 to 2 days
11 to 19 ng/ml		BREED TODAY
OVER 19 ng/ml		BREED IMMEDIATELY if vaginal smear is OK and bitch is still receptive. This is considered LATE.

3. The stud owner will NOT be liable for injuries that may be sustained to the bitch or the owner of the bitch during the breeding process or while on the stud owner's property.

4. Any or all of the following breeding methods may be used, by agreement of the parties and with payment of all costs and charges for such methods as described below.

- A. Natural breeding. The stud fee is \$2,300 for one tie. If time allows a second tie will be granted OR the pick of the litter, at the stud owner's option. You may only be allowed a second tie if the stud's schedule permits. Of this fee, \$500 will be paid at the time of the breeding (the "breeding fee") and is non-refundable. The remainder of the stud fee is due within two weeks after the whelping of a litter of at least three puppies. If fewer than three puppies are whelped, the stud fee will be adjusted to \$700 per puppy. The stud owner will sign the litter registration after receipt of full payment.

It is recommended that the bitch owner has a back-up stud dog available in the event that the stud dog is servicing another bitch, or if the stud dog owner is unavailable, during the breeding window.

If the bitch does not conceive and progesterone testing was done, one additional service will be provided on her next cycle within the next 12 months, at the bitch owner's option. In such event, the \$500 non-refundable breeding fee previously paid will be applied towards the next stud fee.

- B. Natural breeding – Side by Side (Artificial Insemination). Same stud fee as the Natural breeding above. The stud owner, the collector, or inseminator will NOT be liable for injuries that may be sustained to the bitch or the owner of the bitch during the breeding process or while on the stud owner's or the Herr's residence. Kendall Herr and Elizabeth Arellano are very experienced dog breeders who only use artificial insemination. They have done all of my side by sides successfully without any complications and have

FC AFC Wight's The Dark Side "Vader"

Stud Agreement

produced consistent large litters with Vader's collections. I highly recommend doing side by sides for your breeding.

Pros of Side by Side:

- It is less stressful on the male and female.
- Reduces the chance of transmitting diseases between dogs.
- Semen can be analyzed after the insemination for quality.

- C. Fresh chilled. The stud fee is \$2,300 for one collection, if time and schedule permit two collections will be provided, OR the pick of the litter, at the stud owner's option. You may be allowed a second collection only if the stud's schedule permits. A non-refundable deposit of \$600 of the fee must be received by the stud owner prior to the shipment of fresh chilled semen. The deposit will be applied toward the stud fee.

When we are in Gainesville, Texas, Vader can be collected and semen shipped overnight via FedEx directly to you. You will be responsible for the following additional expenses prior to shipping the collected semen.

Collection kit:	\$168	
Collection fee:	\$50	
Estimated FedEx cost:	\$80	Monday through Friday Collection sent overnight priority mail. Received and inserted the next day!

The collection kit that I use is from Innovative Canine Reproduction.

<https://www.innovativecaninereproduction.com/chilled-semen-kits.html>

After the collection occurs, the semen will be sent overnight to your veterinarian via Fed Ex.

If I am out of town and you would like to have Vader collected, the bitch owner will be responsible for all travel expenses of the stud owner, as well as veterinary expenses and shipping. The bitch owner agrees to provide a credit card number to the collecting veterinarian to cover any costs.

5. The bitch owner agrees that no puppy produced as a result of this breeding will be sold to a pet shop, agent or broker.
6. The stud owner is not obligated to sign an application for litter registration with the AKC, nor may such application be made, unless and until all applicable terms of this agreement have been complied with in full.
7. If the bitch's owner(s) fail to fulfill the conditions of this agreement, the bitch's owner(s) will be responsible for all reasonable attorney's fees, costs and/or expenses incurred by the stud owner to ensure compliance with the agreement.
